Memory, Attention and Mental Health in Down syndrome

The aim of this study is to understand how important cognitive skills like memory and attention are related to mental health in individuals with Down syndrome

Participants will complete two short activities that measure memory and attention. Caregivers will complete a questionnaire about their loved one's behaviors, emotions and interpersonal relationships.

Location

- Online! All sessions will be conducted online using Blackboard Collaborate Ultra which can be accessed with any smart phone, tablet or computer.

Are you eligible?

- Ages 10 – 18 years old
- No existing Autism Spectrum Disorder
